

WEED-PREVENTING PAPER FOR USE IN PLANT CULTIVATION

ABSTRACT OF THE DISCLOSURE

A weed-preventing paper with multiple functions for use in plant cultivation is provided. The weed-preventing paper includes a paper body covering a surface of a soil where the plant is to be grown, and having at least a cross opening for the plant to pass therethrough, a weed-preventing agent contained in the paper body for blocking light so as to prevent the growth of a weed surrounding the plant, and a water indicator printed on the paper body and showing a hydrous and an anhydrous states thereof via different colors for being a reminder of watering.
